

From Chairman's Desk

**Plastic Pollution**

As the world's population continues to grow, so does the amount of garbage that people produce. On-the-go lifestyles require easily disposable products, such as plastic Packets or bottles of water, but the accumulation of these products has led to increasing amounts of plastic pollution around the world. As plastic is composed of major toxic pollutants, it has the potential to cause great harm to the environment in the form of air, water and land pollution. Put simply, plastic pollution is when plastic has gathered in an area and has begun to negatively impact the natural environment and create problems for plants, wildlife and even human population. Often this includes killing plant life and posing dangers to local animals. Plastic is an incredibly useful material, but it is also made from toxic compounds known to cause illness, and because it is meant for durability, it is not biodegradable.

Whenever we go for shopping, we should not forget to carry a paper or cloth bag. Also, try to avoid bringing plastic bags at home and purchasing items with too much of packaging. This way you can help in contributing towards the environment in the form of reducing plastic pollution whose ill effects are irreversible.

Plastic bags were once a modern convenience but can be efficiently replaced by reusable bags, many of which fold up compactly in order to be portable. Just think about how many bags you typically carry out of a grocery store, and multiply that by the number of times you grocery shop. That's a lot of plastic! Carry a bag and always reuse plastic bags as much as possible if you have them. Plastic , Bottles, food containers, lids, and utensils can easily be replaced by reusable containers, which will cut down significantly on even a single meal's waste.

THANKS AND REGARDS

Progress report:

1. UC for the Park at Municipal Office is Submitted to MED , North 24 PGS
2. The Work for Construction for Park has been put to Tender after the DPR from the same is approved by the State Level Committee
